Did you know that on average a human being loses 3.5 kg of skin flakes every year? On the face, for example, these are not just blown away like feathers; instead they stick to the surface. The consequences: large pores, deep lines, dryness, scarring, impurities, or pigmentation. Glycolic and natural fruit acids in high doses can really work wonders as a cure.

## INSTRUMENT-BASED COSMETICS

### Clearly visible skin rejuvenation

## PLASMALIFTING

### The non-invasive revolution in the area of anti-ageing

---

For this technology, a heated ionised arc is created between the skin and the plasma device, and this arc interacts with the skin surface. The device generates the plasma flow, and this triggers a special mechanism when it interacts with the biological tissue – undesired excess skin is carried away. The energy of the arc has a regenerating effect on the various skin structures, the connective tissue, and particularly lastingly on the cells.

From CHF 75.00

## LED PHOTOTHERAPY

### A booster for the anti-ageing treatment

---

In LED phototherapy, the skin is exposed to monochromatic light (at a single wavelength). This creates a gentle bio-stimulation for improving cell function, blood circulation, and also for skin rejuvenation. When used with beneficial active ingredients, the full potential effect is developed.
